## ANZ Head of Australian Economics, David Plank, commented:

Consumer confidence increased 3.7% last week, possibly helped by the state budget initiatives in NSW and Queensland. Confidence increased by 4.3% and 5.2% in NSW and Queensland respectively. Household inflation expectations dropped 0.2ppt to 5.7%, despite an increase in the average petrol price over the week. The subindex capturing whether it is a good ‘time to buy a major household item’ has jumped 14.2% over the past two weeks and was the biggest driver of last week’s gain in confidence. The improvement in sentiment doesn’t mask the fact that it remains exceptionally weak, with all subindices well below neutral. We expect this week’s retail figures for May to confirm that spending is holding up despite low confidence.
