ANZ Senior Economist, Adelaide Timbrell, commented:

ANZ-Roy Morgan Australian Consumer Confidence edged higher but is still very weak compared to the long run average. The increase in confidence in recent weeks has been driven by outright homeowners and those paying off their homes, perhaps buoyed by rises in housing prices and the potential stabilisation of rates. Confidence about future finances has exceeded the neutral level for the second time since January 2023. There are limits to the overall increase in confidence though, as households continue to face the impacts of rapid inflation. Renter confidence has been trending down, perhaps due to low vacancy rates driving stronger rent growth, among other rapidly rising living costs.
