**Next release:**

October 2023 data

**Expected release date:**

Monday 6 November 2023

**ANZ-Indeed Job Ads: stable**

ANZ-Indeed Australian Job Ads ticked down by 0.1% m/m in September following a downward revision in August to +1.7% m/m from +1.9% m/m.<sup>1</sup> In trend terms, the series rose 0.8% m/m in September.

ANZ-Indeed Australian Job Ads has fallen 8.2% from the September 2022 peak but remains 51.4% higher than pre-COVID levels.

	Seasonally adjusted		
	% m/m	% y/y	% on Feb 2020 (pre-COVID)
<b>ANZ-Indeed Job Ads</b>	-0.1	-8.2	51.4

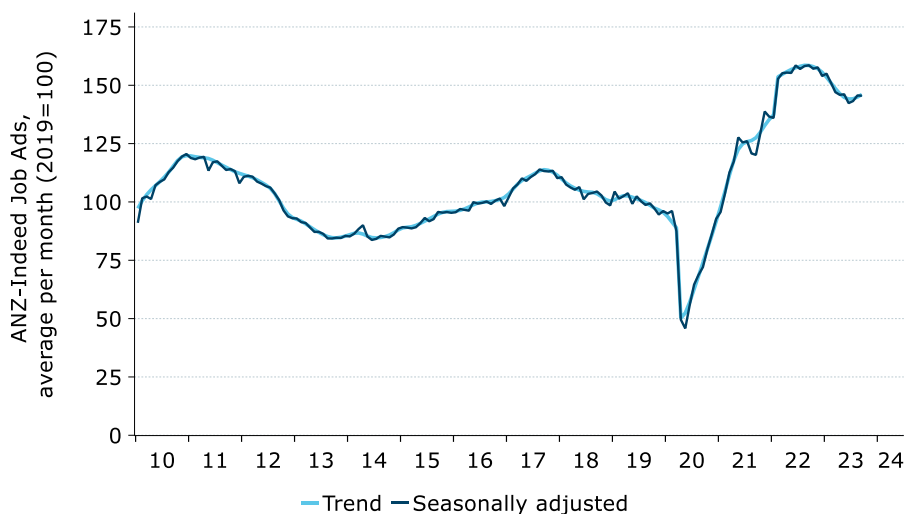

See page 4 for [technical details](#)

**ANZ Economist, Madeline Dunk:** ANZ-Indeed Australian Job Ads remained steady in September, falling just 0.1% m/m. The series has demonstrated remarkable staying power recently and has lifted 2.2% over the last three months.

The Australian labour market is loosening. While things are still tight, the underemployment rate has been creeping upwards, the unemployment rate has risen to 3.7% and hours worked fell in August. This continued cooling of the labour market should help temper any future gains in Job Ads.

**Indeed Senior Economist, Callam Pickering:** Over the past three months, the overall increase in Job Ads has been concentrated in education and healthcare, specifically therapy, doctors and nurses. Even retail has rebounded a little owing to strong Christmas hiring. Gains in these areas have offset ongoing weakness in tech and food preparation.

Job Ads have increased in almost half of occupational sectors over the past three months, reflecting a notable change from the broad-based declines observed earlier this year.

**ANZ-Indeed Australian Job Ads fell just 0.1% m/m in September**

## Appendix

### Data sources

The internet series counts the average number of job ads carried by each of the sites contributing to the series on the same day of each week in the month indicated. The day (which is not necessarily the same for each site) is selected by the site operator as broadly representative of its activity levels. The data are based on information provided by the operators of the following sites:

- Indeed (au.indeed.com); 2018-ongoing
- Workforce Australia, Department of Employment and Workplace Relations (workforceaustralia.gov.au) and previous iterations; 1999-ongoing
- SEEK (seek.com.au); 1999-2022
- Newspaper job ads; 1975-2018

### Seasonal adjustment and trend

X-11 ARIMA is used for seasonal adjustment. New and revised original monthly data can result in revisions to the seasonal factors for historical estimates.

The trend data series was suspended during the pandemic but was reinstated from the September 2022 release.

### Recent changes

The series formerly known as ANZ Australian Job Ads has been updated and renamed ANZ-Indeed Australian Job Ads, effective from the March 2023 release.

- Original data from the ANZ Australian Job Ads series were revised from January 2018 to September 2022 for the ANZ-Indeed Australian Job Ads series, reflecting the addition of Indeed data. This has changed seasonally adjusted and trend estimates. SEEK data input ended in September 2022.
- The series is now an index using 2019 as the base (2019 average = 100).
- Historical data going back to 1975 is published [here](#).
